

mateco celebrates one year in Mexico with great achievements

Puerto Morelos 08/04/2023.- mateco, world leader in machinery rental services for the construction industry and related sectors, is proud to announce its first year of operations in Mexico.

The company has made great strides since it started. It has positioned itself as a trusted partner for construction professionals and other industrial sectors throughout the country.

Present in key projects for the development of Mexico

Since his arrival in Mexico, he has played a crucial role in various infrastructure projects that have contributed to the development of the country.

Among the most outstanding projects are the Mayan Train, the Tulum airport and the Dos Bocas refinery, among many others, where mateco has provided machinery rental solutions that have boosted the efficiency and success of the works.

State-of-the-art rental machinery

The company prides itself on having a diversified fleet of state-of-the-art equipment, including lift platforms that reach up to 57 meters, as well as truck-mounted platforms

(TMPs) with an impressive height of up to 90 meters. The latter being the tallest and with the greatest capacity of its kind available for rent in Mexico.

In addition, it offers telescopic handlers and light generators that meet the specific needs of each project.

Social and environmental commitment

One of the fundamental pillars of mateco is its commitment to sustainability and care for the environment. In this sense, the company's goal is that **by 2030, 70% of its fleet is made up of electrical machinery**, seeking to reduce its carbon footprint and promote responsible practices in the sector.

It has also shown its **support for equal opportunities, breaking gender barriers in the industry**. An inspiring example is [Daniela Cruz, a mateco operator](#), who has excelled in a sector traditionally dominated by men, demonstrating her talent and skills as a professional. Being one of those in charge of operating the RUTHMANN T900 HF equipment whose working height is 90 meters.

What will mateco do next?

Looking to the future, mateco is pleased to announce that **at the end of 2023 it will inaugurate its headquarters in the State of Mexico**.

This new operations center reflects the company's growth and commitment to Mexico, providing a more agile and efficient service to meet the demands of its customers.

In addition, it has an **ambitious expansion plan, with the opening of at least two more branches** in different regions of the country by 2024.

“We are enormously grateful for the trust of our clients in Mexico. It has undoubtedly been the right decision to take the step of consolidating our presence here.”

- Ignacio Sánchez, CEO of mateco Mexico

The mateco team deeply appreciates the trust placed by its customers in this first year of operations in Mexico. The company reaffirms its commitment to continue providing high-quality, safe and efficient machinery rental services, thus contributing to the development of the industry and the materialization of projects that strengthen the country's infrastructure.
